(54) WOOD MEAL NOVOLAK RESIN AND ITS PRODUCTION

(57)Abstract:

PURPOSE: To obtain the subject resin, having a low melting point, excellent in processability and fluidity and useful as molding materials, etc., by reacting wood meal with a specific amount of phenols in the presence of a small amount of an acid.

CONSTITUTION: The objective resin having 60-100°C melting point is obtained by reacting various wood meals with phenols at a charging weight ratio of 3.5-50 times (based on the wood meals) in the presence of a small amount of an acid.
